- Go Programming Language
- Python
- PHP
- Javascript
- HTML5/CSS3
- SQL
- Docker
- Git
- Linux System

Projects

Student Management System

10/2023 – 05/2024

I worked as a Backend Developer in the Student Management System of Yavuzlar team in Siber Vatan.

Courses

CEH

I acquired fundamental cybersecurity knowledge and skills.

Kali Linux

I learned how to use Kali Linux, write Bash scripts, and use basic cybersecurity tools.

Penetration Test

I learned about the stages of penetration testing and became familiar with commonly used tools.

Reverse Engineering

I learned how to analyze malicious files and conduct static and dynamic analysis.

Web Security

I learned about the OWASP Top 10 and practiced on VulnLab, where the Yavuzlar team from Siber Vatan develops

Bootcamp

For 10 days, we learned about different high-level cybersecurity topics and cracked various challenges called CTFs. Finally, I won the top prize with Team Yavuzlar at the bootcamp.

Profile

In high school, I studied Web Design at Göztepe Vocational and Technical Anatolian High School. Even though I couldn't get into computer engineering at university, I found a school where I could study something related and also do a minor in computer engineering. Now, I'm a third-year honors student majoring in Mathematics and minoring in Computer Engineering. In my second year, I joined the Siber Vatan program and received a lot of quality trainings.

Education

Zonguldak Bülent Ecevit University

Present | Zonguldak

Göztepe Vocational Anatolian High School

Istanbul

Publications

Docker

I explained simple docker usage.

Docker Escape

I explained how to escape from docker.
